Economical to buy. Even more economical to operate

Why wait for hot summer days to do booming patio business? With patioSchwank radiant heaters, your patio will be the first to open this spring - and the last to close this fall. And that's just the start. With patioSchwank radiant heaters, you heat up your profits by:

- ✓ Multiplying the number of days you earn maximum sales from your patio, because you - not Mother Nature - controls the comfort level of your patrons. You could even open on a winter day (existing patioSchwank operators have held special event parties on their patios in mid February!).
- ✓ Extending your patio hours to last call.
- ✓ Accommodating patrons who smoke by offering a heated outdoor area for smoking.
- ✓ Generating more repeat sales inside your restaurant. Why? Customers come more often because they know you can accommodate them regardless of the temperature.
- ✓ Cutting your fuel bills, thanks to the energy efficiency of patioSchwank heaters, the latest design breakthrough from Schwank, the world leader in infra-red heating technology since 1951.
- ✓ Choosing the patioSchwank heater that is right for your budget and application.

**Payback
in as little
as one
season!**

Now
Available with
Remote
Control

Add it all up and it's easy to see why patioSchwank heaters offer payback in as little as one season. So don't be left cold by inferior patio heaters. Choose patioSchwank, the patio heater that is economical to buy - and even more economical to operate.

The world's most efficient patio heater*, plus custom design and *guaranteed performance*

For maximum performance and maximum profits, there is only one choice - patioSchwank Series 1100. It is the only patio heater that offers:

- ✓ Industry-leading temperature increase of up to 35°F - or more
- ✓ Lowest operating cost (under \$1/hour per 1,000 sq. ft)
- ✓ Choose the number of days your patio will operate
- ✓ Able to provide comfortable conditions even when frost and snow begins to form
- ✓ Heavy-duty, high-output industrial burner, originally designed for hard-to-heat airplane hangars and ice arenas
- ✓ Unmatched energy savings provide quick payback in as little as one season**
- ✓ Includes expert design and layout support - and guaranteed performance

- ✓ Perimeter and/or overhead installation ensures safety and saves valuable floor space
- ✓ Remote central control of individual heaters or areas
- ✓ No fuel tanks to handle - gas piped from natural gas or propane supply

**As tested by CSA International to ANSI standards*

***Hemingway's Restaurant in Toronto, Ontario installed patioSchwank Series 1100 in May, 1996, and by August of that year the additional patio business had paid for the heaters and installation. Since then, the restaurant has expanded its patio three times with additional patioSchwank Series 1100 heaters - proof positive that patioSchwank means profit!*

Why patioSchwank?

- ✓ Efficient, clean-burning performance with natural gas or propane gas
- ✓ Four different models - and 27 sizes - for every budget and application
- ✓ Designed by radiant heating specialists (Schwank invented radiant heating in 1951)
- ✓ Durable design and construction to ensure long life and attractive appearance
- ✓ Expert technical support - coast to coast
- ✓ Best warranties in the industry
- ✓ Numerous safety features
- ✓ Comfort you can feel - not wild claims
- ✓ CSA International certification

Gretzky's Restaurant in Toronto, Ontario, was among the first to take advantage of the outstanding performance and profitability offered by the patioSchwank Series 1100

patioSchwank

SERIES 2300

When...

- ✓ Radiant heat needs to be directed at specific areas
- ✓ Limited mounting points for heaters
- ✓ Floor space is at a premium

- ✓ Budget or patio size is not suitable for Series 1100

Features & Benefits

- ✓ Comfort level increase of up to 25°F - or more, depending on local weather conditions
- ✓ Heat up in as little as two minutes

- ✓ More energy efficient than competing models
- ✓ Remote - or individual - control of heaters
- ✓ Saves valuable floor space by being located overhead or on perimeter of patio
- ✓ Unobtrusively mounted out of patron's reach

patioSchwank

SERIES 3000

When...

- ✓ Low ceiling, roof or awning
- ✓ Low clearance to combustibles
- ✓ Flue needs to be vented outside the heated area

Features & Benefits

- ✓ Heavy-duty burner, designed originally for car wash and other harsh environments
- ✓ Tucks in easily under eaves and overhead structures
- ✓ No condensation problems on awning or enclosure

- ✓ Directly vented to beyond the patio area
- ✓ Control of individual heaters - thermostat or on/off switch
- ✓ Unobtrusive overhead mounting frees floor space
- ✓ Focus shield reflector directs radiant heat where needed

patioSchwank

SERIES 4000

When...

- ✓ Portability is mandatory

- ✓ Wide area with no posts, beams or walls to mount patio heaters
- ✓ Piping of fuel (propane or natural gas) is not practical

Features & Benefits

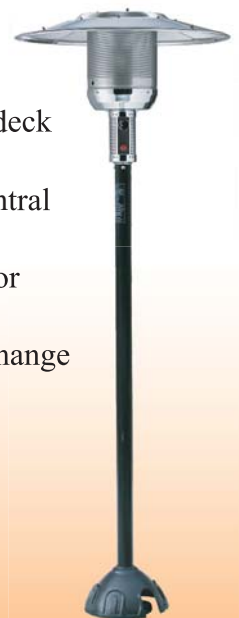

- ✓ Reinforced double heating mantle for higher radiant heat output

Portable Model

- ✓ Available in stainless steel* or durable powder coat finish
- ✓ Propane or Natural Gas
- ✓ Wheels** provide ease of movement
- ✓ Easy storage reflector can be disassembled for compact storage in off-season
- ✓ Battery operated ignitor for quick and sure ignition**
- ✓ Adjustable heat intensity
- ✓ Flexibility to change layout and location

Fixed Model

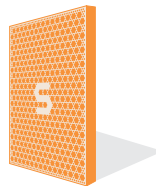

- ✓ Bolt or lag to deck or concrete
- ✓ Piped from central fuel supply - Natural Gas or Propane - no tanks to change or re-fill

* 4001/4N11 models only
